

The National Energy Marketers Association

FALL EXECUTIVE COMMITTEE MEETING AND INDUSTRY LEADERSHIP ROUNDTABLE

The purpose of this year's roundtable discussion is to review the state of restructuring in Texas and also showcase the recommendations of NEM's Internet and Technology Policy Teams on the issues affecting the industry today.

The keynote address will be delivered by Pat Wood, Chairman of the Texas PUC. The roundtable will include NEM's Internet and Technology Policy Chairs who will present NEM's proposals for national guidelines on Internet technology policy, the convergence of energy with the telecom and bandwidth industries, plus policies on competitive billing, metering and customer care.

The National Energy Marketers Association is a national, non-profit trade association representing both wholesale and retail marketers of energy and energy-related products, services information and technologies throughout the United States. NEM's membership includes: small regional marketers, large international wholesale and retail energy suppliers, billing and metering firms, Internet energy providers, energy-related software developers, risk managers, energy brokerage firms, and information technology providers. Members include both affiliated and unaffiliated companies.

About The Association

The National Energy Marketers Association (NEM) is a national non-profit trade association representing a regionally diverse cross-section of both wholesale and retail marketers of energy and energy-related information, services and technology throughout the United States. The Association was created specifically to work with representatives of state and federal governments, large and small consumer groups and utilities to devise fair and effective ways to implement restructuring of both the natural gas and electricity markets. NEM is committed to the implementation of laws, regulations, standards of conduct, rates, tariffs and operating procedures that (a) provide all customers meaningful choice, (b) implement open, efficient, liquid and price-competitive energy markets, and (c) that encourage the development of new and innovative energy products, services, information and technologies, at the earliest possible date.
